What's in a name?

read.csv()

A word on staying organized...

Analysis Time

- (1) View your data and select a variable. Write and run the code to create an appropriate plot for that variable.

- (2) What variable did you choose? What does the plot tell us about the variable?

Summarize the process:

- (3) What might your future self forget about this process? Summarize the steps you took in this lab to use new data in RStudio.
