Round 3: Types of Data and Trigger

Think about the kind of data you need to collect to answer your Research Question.

The trigger signals when it is time to collect this data.

Types o	f Data:
_	
Trigger:	
	Round 4: Survey Questions These are questions you would ask to gather information about your data and the variables. Also, identify the question type (e.g., single choice, text, etc.).
	NOTE: 10 question spaces are provided so that you can create up to 10 questions, if needed.

Round 5: Statistical Questions

These are some interesting questions you might want to answer about the research topic.

REMINDER: In her 2021 paper, What Makes a Good Statistical Question, Dr. Pip Arnold identified the following as features of a good statistical question:

- 1. The variable(s) of interest is/are clear
- 2. The group or population we are interested in is clear
- 3. The question can be answered with data
- 4. The question asks about the whole group, not an individual
- 5. The intention is clear (e.g., summary, comparison, association, time series)
- 6. The question is one that is worth investigating, is interesting, and has a purpose
