

Name: _____

Date: _____

LAB 3A: The results are in! *Response Sheet*

Directions: Record your responses to the lab questions in the spaces provided.

Conducting experiments

Coming up with questions

(1) Write down two statistical questions that will help you answer the *research question* from the previous slide.

Analyzing our data

(2) Write down a few sentences interpreting your plots and summaries.

Wrapping it up

(3) Write and run code using repeated shuffling to determine how likely the typical difference between the two groups occurred by chance alone.

(4) Create a plot and use it to justify your answer.

(5) Write a report using the plots and analysis you conducted to answer the *research question*.
